We do not plan on sending a GE person.

Enjoy the long weekend.

John

Benny will get info to Jen re a contact to set up mtg times etc.

We don't plan on having anyone from EPA attend and the impression I got from you guys the other day was that you were not planning on sending anyone if we weren't; I assume that is still the case on your end.

Have a good fourth all.

Doug

Great. Who is going to attend for EPA? Who do we coordinate with to set specific times and agenda. Jen can take the lead for us.

John

The week of July 13-16th seems to work for the model mtg.

Best location would be Ann Arbor.

Thanks

That's great. When you send us the letter if you can confirm your agreement with the conditions we provided we can then send the disks immediately to Limnotech. We will need the names and addresses of the recipients.

Can we get a times set for the first meeting between AQ and Limnotech?

John

John

I spoke w Doug

Looks like it will be ok for us to send you the first letter even though the corps holds the contracts

So unless you see a problem with that we should get the letter to you
monday

Have a good weekend

As I mentioned to Sherri yesterday I was not exactly sure what was
going to be required in terms of the CBI issue.

Doug had forwarded Sam's email to me the substance of which is as
follows:

"I've talked to Sheri about the mechanism to allow disclosure of
the model code to LimnoTech and to the Corps, once EPA has the
contracts in place. As I understand it, we will use the terms in
40
CFR 2.209(f), which is the general provision allowing "disclosure with
consent of business."

The consent here will actually come from Anchor QEA, which
developed the code and asserted the CBI claim. The conditions that we
think should accompany the consent are pretty straightforward.
AQ will consent to the disclosure provided that EPA gets agreement from
LimnoTech and the Corps they will use the CBI only for the purpose of
carrying out the work required by their contracts with EPA,
and
will not use the CBI for any contract or purpose other than to support
EPA's analysis and evaluation of dredging in the Upper Hudson River.
AQ will reserve its rights under 40 CFR Part 2 with regard to
disclosure of the CBI to any other entity or for any other purpose.

If you agree with the substance of this, then as soon as EPA has
the contracts in place, EPA can send a letter to AQ asking for consent
to provide the code to LimnoTech and the Corps, and AQ will
respond with a letter that provides that consent subject to the

conditions in the previous paragraph."

So, if I understand things the only documentation that QEA needs to see is a letter from EPA that includes a statement saying that LBI and LimnoTech agree to use the CBI only for the purpose of carrying out the work required by their contracts with the Corps (note these are Corps contracts not EPA contracts). It seems hard to believe that things could be that simple, but if that is all it takes please confirm.

Thanks

FYI-drives with model files are ready to go. Awaiting resolution of the confidentiality language and direction on where to send them.

Thanks

John

Hello,

The files have been copied to all 4 drives, the messag.vbs has been included, and the drives are labeled. Each one is packed back into its individual packaging.

Thanks,
Tolga
